Onze rollen hebben een standaard loopvlak van 60mm. Deze afmeting wordt derhalve in de codering weggelaten. Om toch in alle andere gevallen een passende rol te kunnen bieden, hebben we een aantal rollen met een afwijkend loopvlak (bijv. 40mm = L40) of in een afwijkende uitvoering (zoals met nylon kern/flens = N). Hieronder in de tabel vindt u deze rollen.
